Use it to verify extraction works end-to-end.

HIGHLIGHTED TEXT

The theory of relativity was developed by Albert Einstein in the early 20th century.

Quantum mechanics describes nature at the smallest scales of energy levels of atoms.

UNDERLINED TEXT

The speed of light in a vacuum is approximately 299,792 kilometres per second.

Gravity is a fundamental force that attracts objects with mass toward each other.

STRIKETHROUGH TEXT

~~This hypothesis has been thoroughly debunked by modern research.~~

~~The old model of the atom has been replaced by the quantum mechanical model.~~

TEXT NOTE (STICKY NOTE)

 A carries the genetic instructions for the growth, development, and functioning of all life.

The structure of DNA was first described by Watson and Crick in 1953.

Page 2 · Additional Annotations

Machine learning is a branch of artificial intelligence.

Neural networks are modelled loosely on the human brain.

Climate change is the long-term shift in global temperatures and weather patterns.
